History

The Story of Civilization (TAN Publishers) program is narrative-based history curriculum, compatible with a classical pedagogy. It reflects an emphasis in presenting the history of the world as a thrilling and compelling narrative, and is filled with short stories about historical figures, legendary battles, invasions, philosophical debates, construction of architectural wonders, new scientific discoveries and inventions, and the exploration of the world. Because of the structure of this curriculum, additional reading selections are unnecessary. However, there is a compatible history-themed literature selection for each of these grades in the Literature section (see below).
